

**Looking for aftermarket
Cat[®] parts and components?**

AFTERMARKET ENGINE PARTS & COMPONENTS

Energy Link is a high-quality alternative for your Caterpillar® Engine parts and components.

Your West Coast Aftermarket Caterpillar Engine Parts

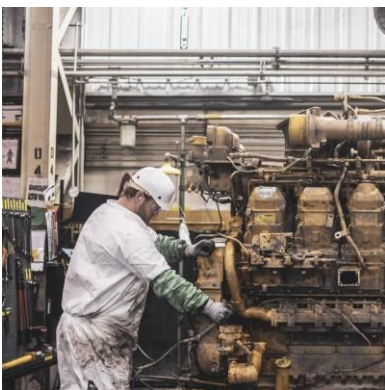

Energy Link is a dependable company that has been operating since 1999. We specialize in serving the oil and gas, power generation, food processing, and other industries by offering high-quality aftermarket engine parts that are customized to our clients' specific requirements. We emphasize customized solutions, industry expertise, and quality assurance, positioning us as a go-to resource for companies seeking reliable and cost-effective solutions. Our ISO Certification and customer-centric approach drives our dedication to quality.

AFTERMARKET ENGINE PARTS & COMPONENTS

3500 Series Kit

8-, 12-, 16-, and 20-Cylinder Engines

Energy Link offers 3500 overhaul parts and components that absolutely match the specifications of original equipment manufacturers (OEMs). We can tailor the kits to meet your specific needs. Our goal is to satisfy our customers by providing customized solutions. We also offer advanced packaging solutions, including custom containers designed to optimize usage.

Energy Link uses CNC-formed layers of foam to ensure that each component is safely secured during transport and staging. Additionally, we package all components in a logical order from top to bottom, which is designed to flow efficiently with typical overhaul work scopes. All containers are clearly marked with corresponding part numbers and are palletized for safe handling.

AFTERMARKET ENGINE PARTS & COMPONENTS

3300 & 3400 Series Kits

3300: 4-, 6-Cylinder Engines | 3400: 6-, 8-, 12-Engines

The CAT® 3300 and 3400 series engines are known for their toughness and durability. Likewise, Energy Link products are designed and manufactured to match this level of sturdiness.

All Energy Link repair and overhaul kits come with state-of-the-art packaging and logical organization as standard. We have got you covered with a wide range of components including camshafts, oil coolers, water pump assemblies and other typical overhaul components.

Custom Kits & Parts

3300, 3400, and 3500 Series Engines

Energy Link offers custom overhaul kits to improve the efficiency of the purchasing, inventory, and repair processes. Our range of custom overhaul kits and repair kits is designed based on typical work scopes.

The possibilities are endless. In fact, customized gasket and repair kits can also be subsets of major overhaul kits. Our packaging techniques ensure that sub-kits can be easily accessed upon opening a customized overhaul kit container and can be distributed to corresponding repair cells or subcontractors without any hassle.
